

Team Management Assignment

Assignment Summary

Now that you have formed your team, why not get creative and use multi-media tools to establish a unique identity and give your project a flashy, but believable, presence and kick-off? Some baseline requirements are listed below. Beyond that, the sky is the limit! Have fun and make your team known to us.

Assignment Requirements

- There are many ways to give your team a unique identity. For starters, your team will need a name. Let us know how you produced it. Please select a name that reflects a professional, IT image - let us leave the cheesy “Cash Man” image to Russell Oliver (oh yah!!)
- Another way to establish a team identity is to create a team logo and/or post team member pictures, write a brief profile for each person, complete a team mission statement etc. Let us know what each person’s talent is in terms of IT project work.
- Your project will need a name, too! It can be fun. For example, a team at E.S. Fox called their Capital Budgeting System project, Fox – CBS. Project names typically become a metaphor for one of its endpoint goals, so provide us with a wee summary of what your team hopes to accomplish in tackling this project. This will require that you research the clients’ organization and what their vision and mission is for the work that they do so that you can communicate to the class how your team can effectively respond to their needs.
- Think about how you will work together and create your own ground rules. Each team will have a unique contract that specifies how members will handle aspects of various group work, such as the ones listed below. It is also an agreement that designates how your team will interact with your instructor for out-of-class needs that may arise.
 - Minimum Contract Details
 - ☐ Team leadership and individual roles (think about general roles such as documenter, designer and archivist that will cover basic team functions. You can designate specific tasks for assignments as the term progresses).
 - ☐ Documentation strategy for tracking meeting content, conversations with your instructor, feedback from clients etc.
 - ☐ Out-of-class meeting times and locations, including check-ins with your instructor.
 - ☐ Strategy for ensuring fair division of labour.
 - ☐ Policy for individual/teamwork deadlines.
- Your team will also kick off the workload by doing three things:
 - Creating a work breakdown structure that shows who is responsible for what and submitting the WBS as part of your document package before your presentation.
 - Doing research to see if there are existing software suites that may meet the client’s requirements. And reasons that your project would be the better choice.

Team Management Assignment

- Provide a beginning data model upon which you will build your application. Review the case and design a data model specific to the Quality Inspector section of the NCR that you can submit for grading and explain during the presentation to begin the process of building the User Experience and Interface Design.
- Lastly, you will present your team identity, mission, and marketing blitz in the form of a 15-to-20-minute presentation. Think about how your presentation can be professional, competitive, and geared to a management audience.
- Your team (one member only needs to submit) will also provide a *document package* submitted to the appropriate link on Brightspace. See Brightspace for a list of required documents.

Assignment Due Date

Teams should have their multi-media presentation content ready to unveil by the date and time posted on Brightspace.

Presentation times will be determined prior to class by random selection.

The assignment will be worth 10% of your term grade. You can refer to the rubric below for details on how you will be graded.

Team Management Assignment

Category					
	0	1	2	3	4
Team Identity	No discernable identity was described.	Identity was achieved by presenting basic team information; however, many team details lack professionalism and relevance to IT project work	Identity was achieved by presenting basic, professional, and relevant team information	...+ team identity was differentiated from other ones by creating a unique and compelling mission statement, vision, and logo	...+ Innovative and extra team themes, not mentioned in the assignment specs, were added and were effective in promoting team competitiveness.
Project and Client Information	No discussion of the client was undertaken.	Basic client info was presented but lacked a connection to the team's project mission/vision	Basic client info was presented and was connected to the team's project mission/vision	... + a profile on specific like-industry needs were researched and discussed	...+ a summary of what current IT solutions is used to respond to similar client needs
Contract Details	No details were provided on how the group intended to work together or deal with issues.	Some contract details are not covered. Most items are vague and unspecific	Contract items follow basic assignment requirements but lack tangibility and specificity (i.e. a team says that they will meet 1X/week, but does not indicate a meeting time/location)	Contract items match minimum assignment specs and are tangible, realistic, and specific	...+ novel and helpful contract details not mentioned in the assignment are added

Team Management Assignment

Use of multi-media Tools	Students provided a text-only presentation.	Valuable information was not captured via multi-media tools – not enough visuals were employed	The employed mediums covered all details via text but lacked creative visuals/symbols	The employed mediums were used to convey information in a variety of ways including visuals/graphics	...+ multi-media mediums were used in skillful and creative ways to communicate expertise and a contemporary presence
Grammar/Spelling	More than three spelling and/or grammar errors were noticed.	Material has many spelling and grammar errors, which are easily detected/remedied via spell check etc.	Material has some grammar, and spelling errors and requires more proof-reading	Material has very few grammar and/or spelling errors (wee slip-ups)	Material is completely free of grammar and spelling errors
Data model	No data model was presented.	A simple data model that either did not meet class specifications for design or was limited in scope was shown. Major effort would be required to iron out the data model to ensure it is effective for design.	A simple data model with issues surrounding design or scope was presented. Work would be required to iron out the issues and make the data model viable for the project.	A well-done data model was presented but it contained a few issues related to either class specification or scope. With some work the data model would be useful.	An advanced data model was presented that appeared to cover all contingencies.

Team Management Assignment

Presentation Delivery	Team completely missed the mark or did not show for the presentation.	Covers the fundamental areas but lacks planning, team organization, enthusiasm, and professionalism	Planned, but needs more involvement from all members. Needs finessing and originality.	Well planned and rehearsed and just needs a “wow factor”	Smooth transitions, clear beginning, and end, rehearsed, geared to a management audience, interesting or original.
Document Package Your work within your team has a significant impact on your team’s grades. Therefore, these have been added to ensure individual participation meets with the group’s expectations.	Student failed to meet the requirements of the Work Breakdown structure. Students who score in this range will receive a grade of 0 for the assignment.	Student work was incomplete or unsatisfactory given time constraints and team expectations (team may have needed to rework submitted material). Students who score in this range will not receive a grade above 25% of group mark for this assignment.	Student work was incomplete or unsatisfactory within constraints and team expectations. The student attempted their assigned tasks, but it was not up to production quality. Students who score in this range will not receive a grade above 75% of group mark for this assignment.	Student work was completed as required and met all requirements though it still required help from the team to complete. Students who score in this range will not receive a grade above 90% of group mark for this assignment.	Student provided the team with work according to the WBS and their abilities. Students who score in this range receive the group’s achieved grade.
